

# VEGA LIGHT-PULL

## SELF-LUMINOUS LIGHT-PULL

A Vega Light-Pull transforms the light switch into a feature of your bathroom or shower-room, combining an elegant high quality light fitting with a unique self-powered light source. By continuously glowing in the dark the Vega makes it safe and easy to find your way. Made in English crystal, Vega is attractive in daytime and eye-catching in darkness, enhancing safety in your home.

Green "Bell" Top Illustrated

- **Uniquely reliable trigalight® light source**
- **Attractive, hand-crafted crystal enclosure**
- **Continuously illuminated for 10+ years**
- **No batteries, bulbs or switches needed**
- **No charging by ambient light needed**
- **Nine trigalight® colour options**
- **Screw-top for easy, secure attachment**
- **Three stylish stainless steel top options**
- **Cost-effective, no spares or maintenance**
- **Designed and made in Great Britain**

***see it in the dark***

## Illumination

Vega Light-Pulls incorporate a trivalight® Gaseous Tritium Light Source (GTLS) which provides a reliable, safe and self-powered source of continuous light output. No electrical supply, battery or charging by ambient light is required during the lifetime of the product. GTLS comprise a sealed borosilicate glass capsule which contains a tiny amount of gaseous tritium, the power supply for the device. Beta-particle radiation (ie. electrons, released by the gaseous tritium as it decays) is harnessed to energise a phosphor coating on the inside surface of the capsule, causing it to glow. As a sealed source, they are non-emissive and of very low energy levels, so there is no external radiation risk. GTLS contain no moving parts and, because the unit is continuously energised, an off/on switch is not required. They will remain energised for more than 10 maintenance-free years, even during extended periods of complete darkness. Trivalight® devices can be used in any environmental conditions, even under water and in temperatures ranging from -20° to 70°C.

Ice-Blue "Cone" Top Illustrated

## Colour Options

Available in 9 colours:

- Red
- Purple
- Green
- UV-blue
- Pink
- Yellow
- White
- Ice-blue
- Orange

## Specification

Vega Light-Pull fittings are hand-made in clear, toughened English crystal.

Stainless steel screw-top.

Diameter: 35.0mm Total Height: 50.0mm Overall Weight: 90.0g max.

Maximum trivalight® Activity: 12.2 GBq.

Attachment cord is not included.

bell

cone

dome

The Vega can be fitted with one any one of three stylish tops, as illustrated
